

This is information on your options for obtaining the required course materials for Math 11 (you will use the same textbook for **all four** quarters: Math 11 - Math 14).

PLEASE READ THIS CAREFULLY!

COURSE MATERIALS FOR MATH 11:

- **Textbook:** *Thomas' Calculus, Early Transcendentals, Single Variable, 15th edition.*
- **MyMathLab Account** (May be required depending on instructor): MyMathLab is an interactive online computer software package that is bundled with the textbook sold in the SCU bookstore or can be purchased without a textbook. It includes:
 - Online access to all pages of the textbook
 - Online homework problems similar to those in the textbook
 - Multimedia learning aids (videos & animations) for select examples and exercises in the textbook
 - Personalized study plan based on performance on online exercises and quizzes

NOTE: Once you have the MyMathLab account you DO NOT need to purchase the additional text book for Math 12-14. Instead you can access the E-textbook with your MyMathLab account!

BOOKSTORE OPTIONS FOR PURCHASING COURSE MATERIALS:

- A. Loose Leaf Textbook (which will be mailed to you) + My Math Lab code
- B. My Math Lab code only

When buying your textbook it would be good to know if your instructor plans to use My Math Lab.

You should activate your MyMathLab account (see below) regardless of whether or not your current instructor is assigning homework through MyMathLab. Lost access codes cannot be replaced; if you lose your access code and haven't activated your account you may have to repurchase MyMathLab, depending on your future instructor(s).

Note: You can use MyMathLab to access the online text even if your instructor does not assign online HW through MyMathLab.

*How do I access MyMathLab?

1. Go to www.mymathlab.com
2. Click "Student" under "Register"
3. Enter your Course ID: *If your instructor is using MyMathLab, they will provide you the course ID* (note: if your instructor is using MyMathLab synced with SCU's Camino you will register for MyMathLab directly through Camino. In this case, your instructor will provide specific instructions on how to register on the first day of class).

Otherwise, enroll in SCU's generic Calculus MyMathLab course: **math53807**

4. If you've used MyMathLab for a previous Calculus class at SCU, sign in with your login/password and you should now have access to the new course (note ONE access code is good for ALL quarters of calculus, so DO NOT buy another access code -- if you're having trouble accessing the course, please contact your instructor).
5. If you haven't used MyMathLab for a previous Calculus class at SCU, you will need to create an account by clicking "Create", then selecting one of the following three options:
 - Use an Access Code (**Access codes can be bought at the bookstore.**)
 - Use a credit card or PayPal (if you didn't purchase the textbook bundled with an access code at <https://www.pearson.com/en-us/subject-catalog/p/thomas-calculus-early-transcendentals/P200000007104/9780137559756>)
 - Get temporary access – this access will give you entry into MyMathLab for 14 days. After the 14-day grace period, you will need to purchase access. (Any work you have done during that time will be saved).
6. Once you've enrolled in a MyMathLab course, you can access the full online textbook by clicking on "Chapter Contents" on the left menu inside the course.

Please contact your instructor, Katelyn Byington (krwhite@scu.edu), or the Mathematics and Computer Science office if you have any further questions.
